

Parked

Parked is one of the best-performing and best-run of the parking services. Customer service is responsive, and you won't feel like you are stuck in someone's bureaucracy. They pay out twice a month, immediately after you earned the money. No waiting for 30 or 45 days.

Consider using their customization tools to build out your site with attractive and useful content; but be aware that too much content can distract people from clicking on the ads. Once you decide to direct some paid traffic to your site keep good records of what you are spending and what you are making. Start small and cancel paid ads that are not converting.

Parked has also been aggressive in fighting click fraud - canceling some accounts of people who appeared to be generating fraudulent clicks. This has paid off for honest domainers who can earn lots of money here.

Default parking pages are very neat and attractive without a lot of content (that can sometimes distract viewers from clicking). Their stats are not as detailed as stats at Sedo or ActiveAudience, but this can be a good thing. Their simple interface is easy to navigate.

Parked continues to thoughtfully refine their system. They have added the ability to host your own images, and even to include your own links and other content.

Domains at Parked include vpncn.com and 76355.com .
